PROMOTION ACTIVITIES OF THE TERRITORY

- **2010** : co-founder and scientific referent of the start-up AQTAN s.r.l., now a consolidated company that produces industrial tannins

PUBLIC ENGAGEMENT

He carries out intense consultancy activities in the chemical – analytical field, acting as an expert on behalf of the Public Prosecutor at the Court of Modena (and other offices), holding the position of CTU of the Judge for preliminary investigations. All the cases dealt with were successfully completed with respect to the questions and objectives set by the investigating judge. In addition, on several occasions he was co-opted by companies and private institutions as an Expert Chemist, appointed consultant of the party (CTP) in the preliminary investigation phase, to identify any cause-and-effect relationships in a preventive form, even solving complex problems to the origin of the dispute between the adverse parties.

By way of example, some court and extrajudicial procedures representative of various thematic contexts, subject to consultant intervention.

- **1998 – 2006** : CTP – 3 cases of attempts at food fraud against and damaging the Consortium for the protection of Traditional Balsamic Vinegar of Modena have been resolved.
- **2001 – 2018** : CTU – In the reference period, 7 cases relating to civil and industrial construction sites were addressed, with construction safety issues (failure to comply with construction

protocols). All cases were resolved during the preliminary investigation phase and out of court, with agreements between the interested parties.

- **2008** : CTU for the Stepney – Ferrari case, brilliantly resolved (the case of the “powder” in petrol for the Formula 1 Grand Prix of Montecarlo); the charges were industrial espionage, sabotage, and other crimes.
 - **2010** : CTU – evaluation of the malicious nature of fire in an apartment, problematic case due to the presence of a female dead person.
 - **2015 – 2017** : CTP – consultant for the circuit of automotive production companies, to solve problems relating painting cycles with serious repercussions on vehicle safety. Once the causes were identified, the case ended with agreements and bargaining between the interested parties.
 - **2017** : CTP – international industrial problem (Italy – Czechoslovakia – England) relating to the production of special multilayer papers for holographic stickers. Case brilliantly resolved on behalf of the Italian manufacturer.
 - **2018** : CTU – domestic accident due to the explosion of a spray paint can and permanent damage to the user’s hand.
 - **2018** : CTU – evaluation of the culpable nature for the installation of a fireplace in an apartment, a problematic case due to the presence of a dead child.
 - **2018 – 2023** : CTP – problems relating to the city methane gas distribution network.
