EDUCATION

- **March 13, 1980** - Degree in Chemistry (summa cum laude) at the University of Modena, with a thesis entitled 'Titolazioni Conduttometriche di Acidi Deboli in Solventi Non-acquosi', under the supervision of Proff. Carlo Preti and Giuseppe Tosi.
- **Jun. 1, 1983** – Assistant Professor in General and Inorganic Chemistry at MM.FF.NN. Sciences Faculty - University of Modena.
- **Nov. 1, 1998** – Associate Professor in Analytical Chemistry at Department of Chemistry, now DSCG – University of Modena and Reggio Emilia

BRIEF DESCRIPTION OF THE RESEARCH ACTIVITY

The scientific activity of Prof. Tassi has been profitably spent on some research areas and the results are contained in 129 international publications (122 articles printed in journals and magazines, 7 chapters of collective books, 1 presentation of collective scientific volume), 3 applications for national patents, and 137 reports at national and international conferences. The scientific skills acquired, refer to spectroscopic techniques, such as Atomic Absorption (FAAS, GFAAS) and Atomic Emission (ICP-OES), Molecular Spectroscopy (IR, Raman, UV-Vis), Electron Microscopy (SEM-EDS) techniques, diffractometric techniques (XRD), thermal analysis (TG, DTA, DSC), ¹H-NMR spectrometry, Mass Spectrometry, electroanalytical techniques (conductivity, potentiometry), as well as standard methodologies for measurements and applications in the liquid state (density, viscosity, dielectric constant, refractive index and related thermodynamic properties), the sampling with solid phase microextraction (SPME) and chromatographic techniques (GC, GC-MS, HPLC, HPLC-MS). Furthermore, specific skills have also been acquired in the field of numerical processing, for the analysis and modeling of databases through the application of common statistical software.

Thematic areas where the scientific activity of Prof. Tassi is well documented, can be summarized as follows:

- ✓ feasibility studies of acid-base conductivity titrations in pure non-aqueous solvents, their mixtures, and water mixtures;
- ✓ synthesis and structural characterization in solid state of acid-base adducts;
- ✓ studies of acid-base equilibrium and electrolytic dissociation in non-aqueous solvents and their mixtures by applying electroanalytical techniques;
- ✓ characterization studies of multicomponent solvent systems by measures of thermophysical properties such as density, viscosity, dielectric constant, refractive index, and thermodynamic properties related to them;

- ✓ development of correlation models belonging to the QSPR class, with classification capacity and predictive capacity, for the study of some properties of liquid systems under ordinary conditions;
- ✓ study of the behavior of benzene-phenyl compounds and dithiocarbamic derivatives by mass spectrometry;
- ✓ synthesis, characterization and reactivity of coordination compounds with elements of the 'd' and 'f' blocks with binders (containing N, O, S, Se as donor atoms) of the 1,4-benzodiazepine type, dithiocarbamic acids, benzenseleninic acids;
- ✓ development and standardization of innovative analytical methods for characterization and classification of food matrices, through the use of dedicated algorithms for the analysis of spectroscopic signals (MIR, NIR) and chromatographic reports (GC, GC-MS, HPLC, HPLC-MS);
- ✓ characterization and classification of natural matrices based on amidaceous, tannic, and derived products with biopharmacological activity;
- ✓ implementation of technology transfer processes for the total valorization of biomasses and waste materials;
- ✓ characterization and classification of pigment materials, metallic materials, binder materials, and other materials relevant for Cultural Heritage researches;
- ✓ synthesis, preparation and characterization of new industrial materials and new processes for REACH-compliance;
- ✓ forensic sciences.

MAJOR COLLABORATIONS

FUNDING AND PROJECTS

- **2010** : 2 borse SPINNER 2013 – Progetto AQTAN (46 K€)
- **2011** : 3 borse SPINNER 2013 – Progetto MOREach (42 K€)
- **2014** : Bando PRRIITT RER - Progetto di Ricerca Industriale “**MALTE-LITOKOL**”, responsabile UO del DSCG; al DSCG = 30 K€
- **2015-2016** : Bando MISE; Progetto di Innovazione Industriale **Industria 2015 – Made in Italy** – responsabile UO del DSCG; al DSCG = 65 K€
- **2016-2018** : POR-FESR RER “**ZERO - Zero Environmental Risks in Our buildings**”; responsabile UO del DSCG; al DSCG = 340 K€
- **2018** – POR-FSE RER – Progetto di Formazione per le Alte Competenze per la Ricerca, il Trasferimento Tecnologico e l’Imprenditorialità “Valorizzazione di scarti agroindustriali per il recupero energetico, la produzione di fibre – grassi vegetali – tannini – principi biofarmacologicamente attivi di uso nutraceutico e cosmeceutico”; borsa di dottorato = 87 K€
- **2019** - POR-FSE RER - Progetto di Formazione per le Alte Competenze per la Ricerca “**NUMAPOS – Nuovi Materiali Polimerici Sostenibili**”; assegno di ricerca = 30 K€

TEACHING ACTIVITIES

- Teacher of the course: **Chimica Analitica I** for science degree in **Chimica** (L27), University of Modena and Reggio Emilia (from the academic year 2017/18 until today)
- Teacher of the course: **Chimica Analitica II** for science degree in **Chimica** (L27), University of Modena and Reggio Emilia (from the academic years 2004/05 until 2016/17)
- Teacher of the course: **Chimica Analitica Strumentale** for science degree in **Chimica** (L27), University of Modena and Reggio Emilia (from the academic years 2004/05 until 2012/13)
- Teacher of the course: **Chimica Analitica** for science degree in **Scienze Naturali** (L32), University of Modena and Reggio Emilia (from the academic years 2015/16 to 2018/19)
- Teacher of the course: **Chimica Analitica dei Processi Ambientali** at the master of science in **Didattica e Comunicazione delle Scienze** (LM60), University of Modena and Reggio Emilia (from the academic years 2019/20)
- Since the 2011/2012 academic year he has been engaged as teacher at the **II level Master Course** “**Gestione delle Sostanze Chimiche: REACH e CLP**”, University of Modena and Reggio Emilia

THESIS SUPERVISOR OF DEGREE AND MASTER DEGREE OF STUDENTS

He is supervisor with didactic and scientific responsibility for the preparation of dissertation Thesis for Chemistry students [101 V.O. (students of the old system); 175 students of the Bachelor's Degree; 39 students of the Master's Degree], Biological Sciences (3) and Natural Sciences (6).

SUPERVISOR OF PhD STUDENTS AND POSTDOCTORAL FELLOWS

- **1999-2002**. Supervisor of one Ph.D. Student, Dr. Moris VIGNALI, working on a thesis entitled ‘Sviluppo e messa a punto di metodi analitici per la classificazione di varietali in matrici enologiche’ – Dottorato di Ricerca in Chimica - UNIMORE
- **2019-2021**. Supervisor of one Ph.D. Student, Dr.ssa Laura MALETTI, working on a thesis entitled ‘Valorization of Biomasses by Applying Biorefinery Strategies’ – M3ES school - UNIMORE
-
- **2016-2018**. Supervisor of 2 year post-Doc Research Fellow, Dr. Carlo BASCHIERI, working on a project entitled “ZERO - Zero Environmental Risks in Our buildings”
- **2016-2018**. Supervisor of 2 year post-Doc Research Fellow, Dr.ssa Lucia BERTACCHINI, working on a project entitled “ZERO - Zero Environmental Risks in Our buildings”
- **2016-2018**. Supervisor of 19 months post-Doc Research Fellow, Dr.ssa Valentina NICOLINI, working on a project entitled “ZERO - Zero Environmental Risks in Our buildings”
- **2016-2018**. Supervisor of 6 months post-Doc Research Fellow, Dr. Michele SILVESTRI, working on a project entitled “ZERO - Zero Environmental Risks in Our buildings”
- **2016-2019**. Supervisor of 3 year Research Fellow, Dr. Elia ANSALONI, working on a project entitled “ZERO - Zero Environmental Risks in Our buildings”
- **2018-2019**. Supervisor of 6 months post-Doc Research Fellow, Dr. Marcello PIGNATARO, working on a project entitled “ZERO - Zero Environmental Risks in Our buildings”
- **2018-2019**. Supervisor of 1 year Research Fellow, Dr. Diego LEONI, working on a project entitled “ZERO - Zero Environmental Risks in Our buildings”

ACADEMIC DUTIES

- **2012-2015** President of the Degree Course Council in Chemistry (L-27) and the Master's Degree in Chemical Sciences (LM-54)

- **2009-2010** Coordinator of Doctorate School in Chemical Sciences at UNIMORE

MEMBERSHIPS AND APPOINTMENTS

- Member of the Division of Analytical Chemistry of the Italian Chemical Society (from 1983)
- Member of the Teaching Committee of the 'M3ES' Doctorate of the UNIMORE

ACTIVITIES IN REFERRED SCIENTIFIC JOURNALS

- Regular review activity for *Journal of Solution Chemistry*, *Fluid Phase Equilibria*, *Journal of Molecular Liquids*, *Journal of Chemical Thermodynamics*, *Trends in Analytical Chemistry*, *Journal of Chemical and Engineering Data*, *Industrial and Engineering Chemistry Research*, *Journal of Physical Chemistry*, *Journal of Structural Chemistry*, *Journal of Thermal Analysis and Calorimetry*, *Physics and Chemistry of Liquids*, *Physical and Chemical Research*, *International Journal of Thermophysics*, ...
- He collaborated with the Publishing House "Research Signpost" (Trivandrum), as Major Editor for the realization of the collective volume **NEW TRENDS IN ANALYTICAL, ENVIRONMENTAL AND CULTURAL HERITAGE CHEMISTRY** (2008)

PROMOTION ACTIVITIES OF THE TERRITORY

- **2010** : co-founder and scientific referent of the start-up AQTAN s.r.l., now a consolidated company that produces industrial tannins

PUBLIC ENGAGEMENT

He carries out intense consultancy activities in the chemical – analytical field, acting as an expert on behalf of the Public Prosecutor at the Court of Modena (and other offices), holding the position of CTU of the Judge for preliminary investigations. All the cases dealt with were successfully completed with respect to the questions and objectives set by the investigating judge. In addition, on several occasions he was co-opted by companies and private institutions as an Expert Chemist, appointed consultant of the party (CTP) in the preliminary investigation phase, to identify any cause-and-effect relationships in a preventive form, even solving complex problems to the origin of the dispute between the adverse parties.

By way of example, some court and extrajudicial procedures representative of various thematic contexts, subject to consultant intervention.

- **1998 – 2006** : CTP – 3 cases of attempts at food fraud against and damaging the Consortium for the protection of Traditional Balsamic Vinegar of Modena have been resolved.
- **2001 – 2018** : CTU – In the reference period, 7 cases relating to civil and industrial construction sites were addressed, with construction safety issues (failure to comply with construction protocols). All cases were resolved during the preliminary investigation phase and out of court, with agreements between the interested parties.
- **2008** : CTU for the Stepney – Ferrari case, brilliantly resolved (the case of the “powder” in petrol for the Formula 1 Grand Prix of Montecarlo); the charges were industrial espionage, sabotage, and other crimes.
- **2010** : CTU – evaluation of the malicious nature of fire in an apartment, problematic case due to the presence of a female dead person.
- **2015 – 2017** : CTP – consultant for the circuit of automotive production companies, to solve problems relating painting cycles with serious repercussions on vehicle safety. Once the causes were identified, the case ended with agreements and bargaining between the interested parties.
- **2017** : CTP – international industrial problem (Italy – Czechoslovakia – England) relating to the production of special multilayer papers for holographic stickers. Case brilliantly resolved on behalf of the Italian manufacturer.
- **2018** : CTU – domestic accident due to the explosion of a spray paint can and permanent damage to the user’s hand.
- **2018 – 2020** : CTP – problems relating to the city methane gas distribution network.

- 4) M. Cocchi, G. Foca, A. Marchetti, L. Tassi, A. Ulrici
Classificazione di spettri MIR acquisiti su matrici di origine cerealicola mediante l'utilizzo dell'algoritmo WPTER
Relazione in Atti di Convegno - II Giornata della Chimica in Emilia Romagna, PR, 6 Dicembre 2002
- 5) M. Cocchi, G. Foca, G. Franchini, M. Manfredini, D. Manzini, A. Marchetti, L. Tassi, A. Ulrici, M. Vignali
Il sistema ternario metanolo + etanolo + 1-propanolo: proprietà volumiche e disegno sperimentale di miscele solvent
Relazione in Atti di Convegno - XVI Congresso Nazionale di Chimica Analitica, Viareggio (LU), 24-28 giugno 2002, pp. 173-174.
- 6) P. Baraldi, L. Tassi, A. Varone
Caratterizzazione Chimica di un Reperto *Bronzeo* Romano
Scienze e Archeologia, Giornate di Studio – Soprintendenza Archeologica di Pompei, pp.197-207 (2003).
- 7) P. Baraldi, A. Bonazzi, C. Fagnano, L. Tassi, P. Zannini
Materiali Pittorici e Pigmenti
Scienze e Archeologia, Giornate di Studio – Soprintendenza Archeologica di Pompei, pp. 209-219 (2003).
- 8) M. Cocchi, G. Foca, A. Marchetti, S. Sighinolfi, L. Tassi, A. Ulrici
Applicazione dell'Algoritmo WPTER per la Classificazione di Spettri MIR di Farine Provenienti da Diversi Cereali
Relazione in Atti di Convegno - V Congresso Nazionale di Chimica degli Alimenti (PR) 9-12 Giugno (2003).
- 9) S. Faranda, G. Foca, M. Manfredini, A. Marchetti, S. Sighinolfi, L. Tassi, C. Zucchi
Selective solvation of chiral compounds in binary mixtures of 2-butanone + 2-butanol
Relazione in Atti di Convegno – 3rd Interdisciplinary Symposium on Biological Chirality, Modena, 30 aprile - 4 maggio 2003.
- 10) G. Foca, M. Manfredini, D. Manzini, A. Marchetti, S. Sighinolfi, L. Tassi, C. Zucchi
Solvatazione selettiva di biomolecole in miscele binarie 2-butanone + 2-butanol
Relazione in Atti di Convegno – pp. AN-CP-058. XXI Congresso Nazionale della Società Chimica Italiana, Torino, 22-27 giugno 2003.
- 11) M. Cocchi, G. Foca, A. Marchetti, L. Tassi, A. Ulrici
Applicazione della calibrazione multivariate su spettri NIR per la quantificazione dell'adulterazione di semola di grano duro con Farina di grano tenero
Relazione in Atti di Convegno - pp. P3. Simposio Italiano Spettroscopia NIR, Lodi, 15-16 giugno 2004.
- 12) M. Cocchi, G. Foca, G. Franchini, A. Marchetti, S. Sighinolfi, L. Tassi, A. Ulrici
Caratterizzazione chimico-fisica di amidi di varia origine

Relazione in Atti di Convegno - pp. P63-P63. XVIII Congresso Nazionale di Chimica Analitica, Parma, 19-23 settembre 2004.

- 13) G. Foca, G. Franchini, M. Grandi, A. Marchetti, L. Tassi, A. Ulrici
Caratterizzazione del Nocino tipico emiliano mediante indagini chimico-fisiche ed analisi chemiometriche
Relazione in Atti di Convegno - XX Congresso Nazionale di Chimica Analitica, S. Martino al Cimino (VT) 16-20 settembre 2007.
- 14) M. Cocchi, G. Foca, M. Li Vigni, A. Marchetti, L. Tassi, A. Ulrici
Determinazione di acidi e zuccheri presenti negli impasti per la produzione industriale di pane a diversi stadi della lavorazione
Relazione in Atti di Convegno - XX Congresso Nazionale di Chimica Analitica, S. Martino al Cimino (VT), 16-20 settembre 2007.
- 15) C. Baschieri, C. Durante, A. Marchetti, A. Berni, L. Bertacchini, S. Covelli, R. Petrini, A. Emili, L. Tassi
Mercury isotope ratios as contamination markers: procedure development and applications in some case-study
Relazione in Atti di Convegno - EMIRATES JOURNAL OF FOOD AND AGRICULTURE - ISSN 2079-052X - 24(2012), pp. 13. Convegno "Food, Functional Food and Nutraceuticals", Ischia, 3-7 Giugno 2012.
- 16) L. Bertacchini, C. Durante, A. Marchetti, M. Silvestri, L. Tassi
Enhancing consumer quality perception towards protected designation of origin products by geographical traceability: the case of Bologna potatoes PDO
Relazione in Atti di Convegno - pp. 177, XXIV Congresso della Divisione di Chimica Analitica della Società Chimica Italiana, Sestri Levante, 15 - 19 Settembre 2013.
- 17) A. Berni, C. Baschieri, C. Durante, A. Marchetti, L. Bertacchini, S. Covelli, R. Petrini, A. Emili, D. Manzini, L. Tassi
Mercury isotope ratios as contamination markers: procedure development and applications
Relazione in Atti di Convegno - pp. 120-121. La chimica nella società sostenibile, Rimini, 2-5 Giugno 2013.
- 18) A. Berni, C. Baschieri, C. Durante, A. Marchetti, L. Bertacchini, L. Tassi
Application of strontium isotopic analysis to the promotion of the Vignola sweet cherry PGI
Relazione in Atti di Convegno - pp. 7-8. XV GdC ER - Giornata della Chimica dell'Emilia Romagna - Modena, 18 Dicembre 2015.
- 19) V. D'Eusanio, L. Lancellotti, L. Lancellotti, L. Maletti, S. Sighinolfi, L. Tassi
Valorization of cucurbitaceae residues from primary agronomic productions; Summer School "Making business with new technologies within green chemistry & sustainable energy", Sarteano (SI), 22-26 July 2019.
- 20) Lidia Lancellotti, Laura Maletti, Fabrizio Roncaglia, Lorenzo Tassi, Marco Borsari
Organic Electrochemical Synthesis of hydrovanilloin, a new bioavailable nontoxic substitute of bisphenol A
Giornate della SCI – Regione Emilia Romagna, MO, 6 Dicembre 2019
- 21) Laura Maletti, Veronica D'Eusanio, Lidia Lancellotti, Lisa Lancellotti, Lorenzo Tassi
Valorization of agri-food residues from industrial processes
Giornate della SCI – Regione Emilia Romagna, MO, 6 Dicembre 2019
